

## Tag List with Descriptions

Tag	What it does
[-email-]	Inserts the full recipient email address
[-xemail-]	Inserts a masked version of the recipient email
[-uname-]	Inserts the username part of the recipient email
[-mename-]	Inserts the username part of the recipient email
[-email_user-]	Inserts the username part of the recipient email
[-email_domain-]	Inserts the domain of the recipient email
[-lowerwer_domain-]	Inserts the lowercase version of the recipient email's
[-c_domain-]	Inserts the lowercase domain name (without TLD)
[-upper_domain-]	Inserts the uppercase domain name (without TLD)
[-rootdomain-]	Inserts the domain of the recipient email
[-domainname-]	Inserts the domain name without TLD
[-domain-]	Inserts the domain of the recipient email
[-sender_email-]	Inserts the sender's email address
[-domainsender-]	Inserts the domain of the sender's email
[-smtpuser-]	Inserts the SMTP username
[-smtpdomain-]	Inserts the domain from the SMTP host
[-emailb64-]	Inserts the base64-encoded recipient email
[-email_link-]	Inserts an HTML mailto link using the recipient email
[-date-]	Inserts the current date in various formats
[-date1-]	Inserts the current date in various formats
[-date2-]	Inserts the current date in various formats
[-time-]	Inserts the current time in various formats
[-date3-]	Inserts the current date in various formats
[-date4-]	Inserts the current date in various formats

[-date+1-]	Inserts the current date in various formats
[-datetime-]	Inserts the current date in various formats
[-seconds-]	Inserts the current second, minute, or hour
[-minutes-]	Inserts the current second, minute, or hour
[-hours-]	Inserts the current second, minute, or hour
[-longtime-]	Inserts the current time in various formats
[-longdate-]	Inserts the current date in various formats
[-shortdate-]	Inserts the current date in various formats
[-isodate-]	Inserts the current date in various formats
[-now_ms-]	Inserts the current time in milliseconds
[-timestamp-]	Inserts the current Unix timestamp
[-current_year-]	Inserts the current year
[-current_month-]	Inserts the current month name
[-localtime-]	Inserts the current time in various formats
[-rndhex-]	Inserts a random hexadecimal string
[-rnd-]	Inserts a random lowercase alphanumeric string
[-randomnumber_10-]	Inserts a random number with specified digits
[-randomnumber_4-]	Inserts a random number with specified digits
[-randomnumber_6-]	Inserts a random number with specified digits
[-randomnumber_8-]	Inserts a random number with specified digits
[-randomletter_10-]	Inserts a random letter string with specified characters
[-randomletter_4-]	Inserts a random letter string with specified characters
[-randomletter_6-]	Inserts a random letter string with specified characters
[-randomuppletter_10-]	Inserts a random uppercase letter string with specified
[-randomuppletter_4-]	Inserts a random uppercase letter string with specified
[-randomuppletter_6-]	Inserts a random uppercase letter string with specified
[-randomletterlow_10-]	Inserts a 10-character random lowercase letter string

[-randomletternumber_10-]	Inserts a random alphanumeric string with specified
[-randomstring_8-]	Inserts a random alphanumeric string with specified
[-randomname-]	Inserts a random fake name
[-fake_name-]	Inserts a random fake name
[-fake_address-]	Inserts a random fake address
[-fake_dob-]	Inserts a random date of birth
[-fake_phone-]	Inserts a fake phone number
[-fake_mail-]	Inserts a random fake email address
[-fake_card-]	Inserts a random fake credit card number
[-vin_number-]	Inserts a random VIN number
[-business_email-]	Inserts a random business email address
[-institute-]	Inserts a random educational institute name
[-company-]	Inserts a fake company name
[-company_address-]	Inserts a random company address
[-job_title-]	Inserts a fake job title
[-city-]	Inserts a random city name
[-random_country-]	Inserts a random country
[-fake_state-]	Inserts dynamic content based on tag
[-fake_zip-]	Inserts dynamic content based on tag
[-fake_tax_id-]	Inserts a fake tax ID
[-fake_company_phone-]	Inserts dynamic content based on tag
[-fake_job_desc-]	Inserts dynamic content based on tag
[-fake_bank-]	Inserts dynamic content based on tag
[-fake_iban-]	Inserts a fake IBAN number
[-fake_bic-]	Inserts a fake BIC (bank identifier code)
[-fake_gender-]	Inserts dynamic content based on tag
[-fake_username-]	Inserts a fake username

[-fake_domain-]	Inserts a fake domain name
[-fake_password-]	Inserts a fake password
[-fake_website-]	Inserts a fake website URL
[-android_os-]	Inserts a random Android OS version
[-android_browser-]	Inserts a typical Android browser
[-apple_phone-]	Inserts a fake Apple iPhone model
[-apple_macbook-]	Inserts a fake Apple MacBook model
[-apple_apps-]	Inserts a random Apple app name
[-random_email-]	Inserts a randomly generated test email
[-android_model-]	Inserts a random Android phone model
[-iphone_model-]	Inserts a random iPhone model
[-random_device-]	Inserts a randomly chosen device name
[-device_brand-]	Inserts a random device brand
[-random_agent-]	Inserts a fake user-agent string
[-device_id-]	Inserts a randomly generated device UUID
[-fake_device_name-]	Inserts dynamic content based on tag
[-browser-]	Inserts a random browser name
[-browser_version-]	Inserts a random browser name with version
[-os-]	Inserts a random operating system
[-os_version-]	Inserts a random OS version string
[-app_version-]	Inserts a fake application version string
[-fake_firewall-]	Inserts a fake firewall name
[-av_name-]	Inserts a fake antivirus name
[-session_id-]	Inserts a unique session UUID
[-random_mime_type-]	Inserts a random MIME content type
[-ip-]	Inserts a random local IP address
[-random_url-]	Inserts a randomly generated URL

[-random_port-]	Inserts a random network port number
[-fake_router_ip-]	Inserts a local fake router IP address
[-fake_mac-]	Inserts a fake MAC address
[-hostname-]	Inserts a fake hostname
[-uuid-]	Inserts a full UUID
[-uuid_short-]	Inserts a shortened UUID
[-random_boolean-]	Inserts dynamic content based on tag
[-random_float-]	Inserts dynamic content based on tag
[-timezone-]	Inserts dynamic content based on tag
[-random_file_name-]	Inserts dynamic content based on tag
[-random_filetype-]	Inserts dynamic content based on tag
[-random_binary-]	Inserts dynamic content based on tag
[-random_octal-]	Inserts dynamic content based on tag
[-random_hex-]	Inserts dynamic content based on tag
[-random_hash-]	Inserts dynamic content based on tag
[-random_word-]	Inserts a random word
[-random_sentence-]	Inserts a random sentence
[-random_color-]	Inserts dynamic content based on tag
[-locale-]	Inserts dynamic content based on tag
[-language-]	Inserts dynamic content based on tag
[-activation_code-]	Inserts a random activation code
[-domainlogo-]	Inserts logo image path from domain if file exists
[-logo-]	Inserts base64 image data for logo if file exists
[-company_logo_base64-]	Inserts base64 company logo image
[-company_logo-]	Inserts company logo as base64 data
[-favicon-]	Inserts favicon image in base64 if available
[-datejp-]	Inserts the date in Japanese format

[-pwdemail-]	Inserts a randomly generated password string
[-qr_code-]	Inserts an embedded QR code image if available
[-links-]	Inserts a random link from the application
